

The **PROJECTOR LIFT VP100** is a versatile product that enables the installation of projectors in environments where particular aesthetical solutions are needed.

The product has been developed to be installed inside false ceilings in order to hide projector, lift and cables, thus granting the best aesthetic and practical solution.

VP100 is supplied with an extremely silent motor that allows a descent from a minimum of 16 cm to a maximum extent of 97 cm.

An interesting element of this lift is a cable gathering system with a raceway where to put the cables of the projector, so they will be hidden and tidy gathered together when the projector lift is moving. The lift is supplied with **safety screws**.
